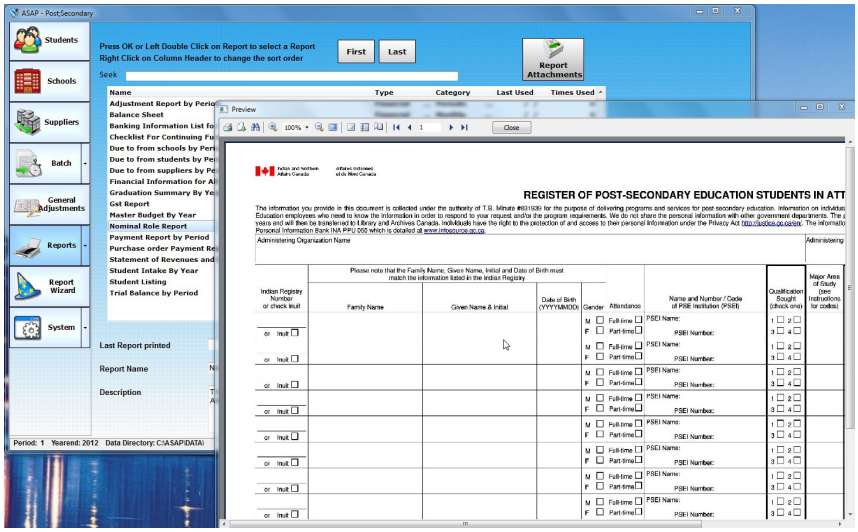
ASAP

Aboriginal Statistical Assistance Programs

Post-Secondary

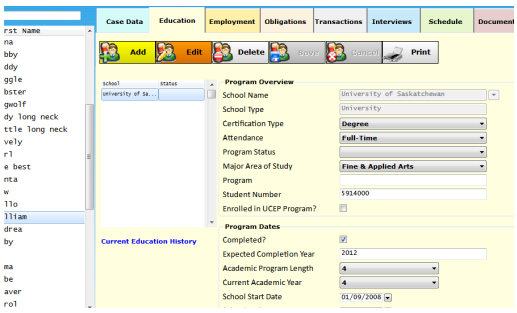
Tracking educational records and financial expenses are integral to running an organized post-secondary office. With over twenty years of experience serving First Nations, Ferrus Computer Services has the software solutions to simplify and streamline your department



The ASAP Post-Secondary Software tracks the educational history of all band members, past and present. Prepare budgets for tuition and related expenses based on the band's current financials.

Electronically maintain and print transcripts of band members. The program also provides reporting and monitoring on all educational trends and grades throughout your membership. Quick and easy access to student and education information allows you to easily manage all post-secondary students in your community. Produce proof and documentation of expenditures on each student and automate payments to diminish your workflow.

ASAP Features



- Conveniently Print the Completed Nominal Roll
- Maintain Student Transcripts
- Budget Funding Sources & Expenditures
- Track Educational History
- Maintain Current Student Records Automatically
- Manage and Pay All Student Financials

Who Is Ferrus Computer Services?

Ferrus Computer Services has been developing software for First Nation Administrations for over twenty years, since 1994. The ASAP program was created to assist in tracking the financial assessment, person details and reporting of each First Nation.

Today, Ferrus Computer Services applies broad experience, technical knowledge, and business expertise to develop and maintain computer software and services that continue to meet and exceed the needs of the First Nation.
Ferrus Computers Services is known for providing skilled technical support and excellent customer service, building long term relationships with their clients.
